•CREATE • STREAM • VISUALIZE

Create: Leaping from the media industry to our workplaces and homes, real-time enables content creators. Performance capture, game engines, volumetric technology, and real-time systems produce increasingly sophisticated images and experiences for millions of users.

Stream: Cloud, 5G, and 10 G, combined with powerful real-time editing tools and increasing computational power, allow real-time processing using machine learning while streaming globally.

Visualize: From high-resolution, large format OLED TV to laser projectors to MicroLED-based Crystal LED Screens; displays technologies follow the real-time revolution. VR, AR, and XR devices create a new generation of visualization experiences.

CREATE

Artists create wherever they are on the planet

STREAM

5G and cloud allow them to work together collaboratively in real-time

VISUALIZE

High-end displays allow them control over the quality of the image never seen until now.

RTC 2020
RealTime Conference

The RealTime Conference is your venue to engage in this transformative power, interact with players who are shaping the future, and discover the tools and advances in technology that are changing the way we live and do business.

The intense focus on real-time guarantees an event that blurs the boundaries between adjacent industries and encourages cross-pollination between communities too often siloed.
